

News Tracker Application

Date	24 October 2022
Team ID	PNT2022TMID27612
Project Name	Project - News Tracker Application

Minutes of the meeting: Sprint 1 Meeting: 1

1. To create a folder for sprint 1 in the given repository
2. Install the necessary requirements and packages for installation
3. Planned to create a basic UI layout for
 - Registration
 - Confirmation
 - Login
 - Dashboard
4. To do necessary routing for it
5. Ensure that the modules built met with the objectives of the project as per the sprint plan

The screenshot shows a Zoom meeting interface. At the top, a banner indicates "VERONI SHWETHA D 19IT022 is presenting". The main window displays a presentation slide from Codecademy titled "Jinja templating". The slide content includes:

- Created using keyword arguments in `render_template`:** template variables are substituted into a template when using expression delimiters `{{ }}`.
- Used in Jinja templates,** expression delimiters `{{ }}` surround expressions such as variables to be identified by the template engine.
- Template Variable Filters**
Filters are applied to template variables and perform a small focused action. Filters follow a variable and are separated by the pipe, `|`, character. This syntax works inside expression `{{ }}` and statement `{% %}` delimiters.
More information on filters can be found in the [Jinja documentation](#).
- Template if Statements**
`{% if condition %}` statements are used in templates to control the content that is returned from Flask routes. Content associated with an `if` statement is enclosed in blocks starting with `{% if condition %}` and closing with `{% endif %}`. `else` and `elif` can be used with `if` statements to further control the content.

Code snippets from the presentation:

```
# If the template variables are substituted into "my_template"
# {{ template_var1 }} and {{ template_var2 }}

<!-- Capitalize the string -->
<!-- {{ heading_var | upper }}</!>

<!-- Default string when no var not declared -->
<!-- {{ no_var | default("My Website") }}</!>

<html>
<body>
<div>
  {% if template_fool == "happy" %}
    This Page is Happy
  {% elif template_fool == "sad" %}
    This Page is Sad
  {% else %}
```

On the right side of the Zoom window, there is a grid of participant avatars:

- VERONI SHWETHA D 19IT022
- RAKSHA V G 19IT064
- ELIZABETH SUBHIKSHA VICT...
- You (with a BTS logo)
