The screenshot displays a development environment with the following components:

- EXPLORER:** Shows a file tree with folders for 'base.html templates', 'notificationemail.html', 'mail.html templates', 'profile.html templates', and 'signin.html templates'.
- EDITOR:** Contains a Python script named `message.py` with the following code:

```

def mail():
    # Initialize connection to our email server,
    # we will use gmail here
    smtp = smtplib.SMTP('smtp.gmail.com', 587)
    smtp.starttls()
    # Login with your email and password
    smtp.login(email, mail_pwd)
    url = "https://newsatcher.p.rapidapi.com/v1/search_enterprise"
    querystring = {"q": "newsatcher", "news": "page": "1", "media": "True"}
    headers = {
        "X-RapidAPI-Key": "41ce6c4a4b888b677c72e04166d3ajunc59d4761b6",
        "X-RapidAPI-Host": "newsatcher.p.rapidapi.com"
    }
    response = requests.request(
        "GET", url, headers=headers, params=querystring
    )
      
```
